## Philosophy Statement

At Smartuft's, we believe that children's learning development is according to their ability, passions, talents, skills, gifts, and God's given purpose. As we recognize children learn through play, we strive to create a happy, fun, loving, respectful, nurturing, safe, and caring learning environment by actively preparing the inside-outside daily lessons and activities by using FunShine Express curriculum as the primary guide and many other resources.

As educators, we are fortunate and blessed to have the opportunity of building our children's strong developmental foundation; we are committed to "care, LOVE, respect, and educate" them. We attribute these accomplishments to our partnership with our families by planning and providing events and communication to bring everyone together.

As the director and owner of Smartuft's Academy, I thank God for giving me the opportunity to help our children recognize the unique and special person God created in them. I strive to encourage them and their families to observe their talents, abilities, gifts, skills, and passions; so, that they grow and become enriched citizens, help their families and communities. We also recognize each student enriches our school with their different backgrounds, ethnicity, culture religious beliefs, languages, and personality which creates a positive diverse and inclusive learning environment. We believe interaction and inclusion of families is top priority while modeling a professional relationship among our staff, children, and parents to create a trusting, positive, enriching, and safe environment which becomes the foundation of the children's developmental journey.
